4. Diaper Pails—"soak" solution
5. Garbage cans, telephones, fishing boxes, etc.
6. Refrigerators and freezers
7. Killing infectious bacteria
8. Pet Owners—Kills canine parvovirus and feline leukemia

## Instructions for a Self-Cleaning Bathroom

This is a one-time-a-year procedure! Once you have completed this over all clean up, you can sit back, relax, and never have to do this big job again.

1. **To get rid of build-up of soap residue in showers, on tiles, bathtubs, sinks, etc.** Use a wet Shaklee Miracle pad with Shaklee's [ScourOff](#) and plenty of water. Rub or brush gently. Rinse with clear water. Wipe down with a solution of 1 Tbsp [Basic G](#) per 1 gallon of water to kill mildew. If mildew is lodged in grouting or seams, brush with full strength [Basic G](#), let set one hour, then rinse. Need more brightening/whitening? Make a paste using Shaklee's [Nature Bright](#) and [ScourOff](#), brush on, let set, rinse.
2. **To get rid of film on mirrors and windows.** Mix 2-4 drops of [Basic H<sup>2</sup>](#) in 16 oz. water in a spray bottle. If you have been using other glass cleaners, you may get streaks until the oil residue they leave is cleaned off with the new [Basic H<sup>2</sup>](#) solution. Be sure you use only drops when mixing. This works great for dusting. Spray on your dust rag and dust even your best wood furniture.
3. **To Disinfect.** Mix ½ tsp [Basic G](#) in 16 oz water in a spray bottle. Use this to wipe the outside of garbage pails, diaper pails, bathroom vanity, kitchen sinks, toilet, etc. For best results, let sit for 10 minutes. It's a great deodorizer as well as a disinfectant. Spray throughout the house to kill viruses, etc.
4. **To minimize clean-up in the sink area.** Once soap residue is removed with [ScourOff](#), use Shaklee's [Meadow Clean Bar Soap](#) or [Get Clean Hand Wash](#) from now on to not only to get your hands clean, but to leave no film. It is effectively gentle on your skin.
5. **Bath Tubs.** Using [Basic H<sup>2</sup>](#) — ½ tsp to water, gets the ring out. You can safely take a luxurious bath with this product and once you step out, when the water leaves so does the ring.
6. **To eliminate any cleaning in shower—on walls or doors —from spots.** After soap residue is removed, use only SHAKLEE products because they can't leave film or spots. You can bathe with Shaklee's [Meadow Blend Bar](#), [Shaklee Baby Gentle Wash](#), [Enfuselle Shower Gel](#), [Basic H<sup>2</sup>](#), or yes even [Dish Wash Concentrate](#). Your skin will feel great since these plant based products are soap free, effective, and totally safe. When you use only SHAKLEE [ProSante' Shampoo and Conditioner](#), there will be no ugly residue collecting in your tub, shower, tile or glass walls. Isn't that exciting?
